Jewel Changi Airport

Safdie Architects

Jewel Changi Airport documents the creation of a remarkable addition to one of the world's premier airports. The sinuous, faceted glass Jewel serves as Singapore's new gateway to the world, and redefines what an airport can be. Brimming with terraced plantings, lush valleys, floating bridges, art installations, shops, restaurants, and a central waterfall, Jewel is a new type of destination: part public garden and part shopping and entertainment complex. Through photos, drawings, ephemera, essays, and interviews, the book provides detailed insights on how the project came to be-from its bold vision and concept to the innovative engineering, environmental, and construction strategies employed to make it a reality.

Based on the geometry of a torus, this innovative building design is unique in the way it integrates the social public realm with airport facility

A unique account of how this architectural titan's body of unrealized works might have changed the course of history

With Intention to Build

The Unrealized Concepts, Ideas, and Dreams of Moshe Safdie Safdie Architects // Text by Michael J. Crosbie

Moshe Safdie claims that probably more than fifty percent of his work is unbuilt, and upon review he considers that unbuilt work to be some of it is the most significant work he's done! In this richly photographed book, replete with detailed diagrams, sketches, models and studies, Moshe Safdie explains that for those who design in order to build, not succeeding in building is not a failure—there are many different reasons why things don't get built, but they form a fascinating track through one's thoughts and career; also a historical reference of the social and political forces at play at the time. This important volume is not only a treatise on Safdie's unrealized concepts but also a wonderful account of how there is valuable heritage to be mined in the unbuilt.

A significant compendium of New York City's architecture in the quintessential Beaux-Arts style

An American Renaissance Beaux-Arts Architecture in New York City

Phillip James Dodd; Photography by Jonathan Wallen

From the 1880s to the 1930s, New York City's architecture during this period was rich in grandeur, full of historical reference, and dripping in embellishment—enter the Beaux-Arts style. Coined the Gilded Age and fittingly referred to as the American Renaissance, this era is considered to be the main catalyst for the creation of the modern metropolis that we now recognize as New York City. Lavishly photographed, this wonderful compendium both celebrates and examines this fascinating era, with insightful analysis in terms of both traditional and contemporary contexts.

Richard Manion Architecture II

Adele Cygelman

Richard Manion Architecture creates distinctive residences and estates with a respect for traditional forms and historic imagery adapted to modern living. The curated selection of rarely published projects in this second volume of the firm's work demonstrates RMA's signature style, which draws upon traditional and streamlined classical, regional, and contemporary influences to reflect authentic details, proportions, and a sophisticated sense of place for the twenty-first century.

A beautifully presented compendium of sophisticated modern classicist architecture for the contemporary world

Sarah Blank Design Studio

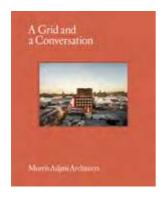

Sarah Blank

Classic, refined, and alluring are just some of the ways to describe Sarah Blank Design Studio's timeless designs of interiors, predominately of kitchens, but also of other rooms of the home. Sarah Blank's vast expertise in the classicist language spanning many decades and her creative vision for contemporary elegance form the basis of her understanding that a beautiful and functional kitchen is not only an integral part of the architecture of the house, but the very heart of the home. This beautifully photographed volume presents a stunning selection of award-winning projects, each showcasing exquisite beauty, attention to detail, and technical prowess.

A Grid and a Conversation Morris Adjmi Architects

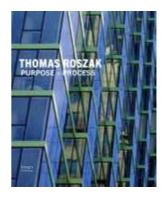

This exquisite book presents a survey of work by the New York City-based firm Morris Adjmi Architects, well known for the Samsung building along the High Line and the Wythe Hotel in Williamsburg, Brooklyn. This firm interprets the complex forces that shape our cities to create buildings that are contextual yet unmistakably contemporary. The monograph is interlaced with reflections from writers, scholars, and collaborators, including Diane Ghirardo, Bill Higgins, and Jimmy Stamp.

Distills the transformative work of a practice who understands that the built environment is constantly evolving as it both absorbs and reacts to greater historical narratives

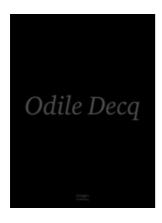

Thomas Roszak Purpose + Process

Lifelong Chicagoan Thomas Roszak is a rarity in the world of design: the architect-developer-contractor. He's well known for sculptural residential towers, as well as technologically advanced "specialty projects," including his own Glass House. This volume covers focused explorations of his approach to technology, sustainability, materials, and construction. Practical and personable, the text and building descriptions offer a wide-ranging, behind-the-scenes look into the architectural profession.

Odile Decq The Wunderkammer of Odile Decq

Text by Lionel Lemire & Robin Thomas Drawings by Lionel Lemire

This book is an invitation to take a voyage and explore the distinctive, radical, and creative powerhouse that is Odile Decq, whose output materializes a complete universe that embraces urban planning, architecture, design, art, and science. From her signature concept of dynamic space, setting body into tension and movement, to lifelong ideals of organic transformation of object, perception, and fluidity of things, Odile Decq profiles the quintessential frameworks of her multidisciplinary design approach. It illuminates her inspirational sources; and most importantly, demonstrates the coherence that is legible on every scale of her work.

Shines a light on Odile Decq's distinctive approach to what is conventionally defined as architecture and design

Pickard Chilton The Value Proposition

Michael J. Crosbie

Relationships between architects and clients—built upon expressed values, as well as their import into the final work of architecture—are rarely considered in architectural criticism or theory, and are usually missing in most writing about architecture. This monograph seeks to highlight and address this deficiency, by focusing on the process that the firm uses to help its clients to define values, and to intone them through architectural design. Exquisitely presented throughout, this volume will present a range of built and in-process works at a variety of scales, complexity, and locations, with various clients. Most of these projects have not been previously published.

Projects are discussed within the context of the value proposition and design process that distinguish Pickard Chilton's approach to architecture
