- The latest IMAGES title published in co-operation with the American Institute of Architects (AIA), following the*Design for Ageing Review* series
- Features stunning photography, informative descriptions and detailed floor plans, as well as essays by acclaimed architectural writers about building in different environments

House for All Regions: CRAN Residential Collection is the first in a series on international residential architecture produced by IMAGES Publishing in partnership with the American Institute of Architects (AIA). The projects are divided into four climate zones: Arid & Semi-arid, Temperate, Arctic and Sub-tropical & Tropical, and each illustrates how architects adapt their designs to accommodate the challenges posed by the local topography and variations in climate. Containing cutting-edge residential designs by leading architects from across the world, including North America, the Caribbean, Asia, and Europe, and featuring rarely seen images, this collection underlines the sensitivity of today's architects to the natural environment, as well as the care and attention paid to interior design and everyday living.
