- Features the homes of a range of leading architects from around the world, including the United States, United Kingdom, Australia, Japan, and Europe
- Explores the interior design techniques, art and decorative pieces, furnishings, materials, and technology incorporated into the homes of those who know the most about them

This stunning book takes a rare glimpse into the intriguing and unique homes of some of the world's best-known architects. How do these architects design their own private domains? How do their furnishing styles impact on the structural integrity of the space? How do these individuals express their interior design flair in their own haven? The title starts by introducing the relationship between the architect and their professional work, by telling how that marries with their own private tastes, and how they interpret current trends and enable their own philosophies to transfer to their personal, private environments. Combining rich photography and spectacular imagery with the personal stories of these industry professionals, this book provides a rich source for those keen to delve into the design aesthetics, concepts and innovations of leaders in their very own field.
